SUMMARY

Final-year B.E. student in Artificial Intelligence and Data Science with strong expertise in Python, backend development. Built scalable applications using Flask Passionate about building efficient backend systems and applying data-driven solutions in real-world scenarios. Open to Software Development, Data Analytics, and QA roles.

TECHNICAL SKILLS

Programming Languages: Python, SQL (MySQL, PostgreSQL), JavaScript, HTML, CSS
Frameworks and Libraries: Flask, SQLAlchemy
Databases: MySQL, SQLite
Tools and Platforms: Git, GitHub, VS Code, Render
Concepts: Backend Development, Database Management,

PROJECTS

Blog Website | *Flask, PostgreSQL, SQLAlchemy, Render* 2026

- Developed a full-stack blog platform with a Flask backend and PostgreSQL database.
- Implemented secure admin authentication, role-based access control, and complete CRUD operations.
- Improved performance by reducing page load time by 40% through query optimization and caching.
- Deployed to production on Render with environment configuration using .env, requirements.txt, and Procfile.
- Link:- https://python-flask-blog-1ed8.onrender.com/

Network Intrusion Detection System (NIDS) | *Python, Random Forest* 2026

- Developed a machine-learning-based Network Intrusion Detection System to identify and classify malicious network traffic.
- Performed data preprocessing, feature selection, dimensionality reduction, and exploratory analysis on network traffic datasets.
- Implemented and evaluated Random Forest models for attack detection and classification.
- Addressed challenges such as imbalanced attack classes and high-dimensional network features to improve detection performance.
- Designed the system with a focus on reducing false positives and improving the detection of previously unseen or anomalous network traffic.

EDUCATION

B.E. in Artificial Intelligence and Data Science | *P.R. Pote* May 2026
Patil College of Engineering and Management, Amravati
Sant Gadge Baba Amravati University, Amravati, Maharashtra
